

# Board Rules

Use post it notes next to your name to complete the table. These post it notes can be updated at any time. Just put a new post it note over top the old one. The most visible note will be considered “active”.

**After graduation:** In this column, write on a post it note your plan for immediately after you graduate. For example, “Enter the workforce”, “College” (Include what college if you know), or “Military” (Include what branch of the military if you know)...If you have plans other than those examples, that’s fine, just write a few words to describe them.

**Target Career:** This is just the career you are currently aiming for, it can be in any field. It does not have to be directly related to this program.

**Personal Project:** If you wish to work on a personal project, write a few words to describe what it is. If it is a tutorial that you follow along with, include the word “Tutorial”, if it is something you are working on based on something you just want to try and develop, write “Trello”

- If you write “Trello” this means that you will have a Trello board with broken down steps of what you plan to work on. Make sure you break the problem down into small, manageable pieces.

When you are done with all class work, if you are not working on a personal project and think you have nothing to do, use the time to research your “Target Career”. Create a document saying what it is, what the typical duties are, what education is necessary, and what you can do now to improve your odds of achieving your goal.

When that is done, create articles in your portfolio with any of the following:

- If you are planning to go to college, use the time to explore scholarships that may be available to you.
- If you are planning to go into the military, use the time to explore what sign up bonuses and other perks may be available to you before you join.
- If you are planning to directly enter the workforce, select a target area and craft your resume so that it best fits that industry.
